The Ministry of Electronics and Information Technology (MeitY) under the Digital India Program has undertaken a unique initiative, BHASHINI, the National Language Translation Mission. Mission BHASHINI was launched by Hon'ble PM on 4th July 2022 during Digital India Week 2022 in Gandhinagar, Gujarat. Vision of BHASHINI is to "Harness natural language technologies to enable a diverse ecosystem of contributors, partnering entities and citizens for the purpose of transcending language barriers, thereby ensuring digital inclusion and digital empowerment in an Aatma Nirbhar Bharat."

In order to build this ecosystem, The Digital India BHASHINI Division (DIBD), an Independent Business Division under Digital India Corporation (DIC). The DIBD is managing and executing the activities of "National Language Translation Mission": BHASHINI. BHASHINI (<https://www.BHASHINI.gov.in>) has been developed as a platform where various components have been integrated to bring stakeholders together. BHASHINI works with some of the premier academic institutes, including IITs and IIITs) in India. These institutes are developing state of the art language AI models for various Indian languages. BHASHINI platform already hosts 300+ AI based language models in various technologies.

Digital India Corporation/BHASHINI is currently inviting applications for the following positions purely on Contract/ Consolidated basis.

Job Description

We are looking for an API Developer to join our team. In this role, you will design, build, and maintain APIs that power our AI/ML and enterprise applications. You will work closely with cross-functional teams to ensure APIs are secure, scalable, and reliable, supporting smooth integration across systems.

This role is ideal for someone with strong programming skills, experience with API frameworks and management tools, and the ability to deliver solutions in a fast-paced, collaborative environment.

Role & Responsibilities

1. Design, develop, test, and maintain APIs for AI/ML-based applications.
2. Convert AI/ML and NLP models into usable APIs and SDKs for enterprise use.
3. Handle the complete lifecycle of NLP projects, from data preparation to deployment.
4. Use frameworks such as FastAPI, Django, or similar for API development.
5. Develop and maintain APIs across various products and platforms, including APISIX, Apigee, Kong, and custom integration solutions.
6. Implement and manage API versioning, lifecycle management, and backward compatibility.
7. Ensure APIs are secure, scalable, and perform efficiently.
8. Monitor API performance, usage, and health using appropriate API monitoring and observability tools, and resolve issues in a timely manner.
9. Integrate APIs with different systems to ensure smooth data flow and compatibility.
10. Provide technical support during customer/user onboarding and assist with integration-related queries.
11. Work closely with internal teams to identify gaps, improve processes, and enhance solution delivery.
12. Deliver exceptional customer service by leveraging strong communication and analytical skills in a client-facing role.
13. Analytical mindset with a solution-oriented approach to complex challenges. Strong problem-solving skills with a focus on delivering practical solutions.
14. Be flexible and available to travel as and when required to meet business needs.

Required Profile

| | |
|--------------------------------------|--|
| Essential Qualification & Experience | <ul style="list-style-type: none"> • A Full time B.S./B.Tech. /B.E. or equivalent degree or B.Sc. (IT/CS) with a Post-Graduation in a Technical Background may be considered. • MBA/M. Tech (Preferable) |
|--------------------------------------|--|

- 3+ years of experience in designing, developing, and maintaining scalable APIs for enterprise applications.
- Strong hands-on experience with API development frameworks such as FastAPI, Django, or similar.
- Proven expertise in API management/gateway platforms like APISIX, Apigee, Kong, including API versioning, lifecycle management, security, and performance optimization is preferred.
- Experience in integrating APIs with multiple systems and providing technical support during client/user onboarding and integration troubleshooting would be an added advantage.
- Experience in integrating AI/ML models, including NLP-based models, into APIs or enterprise solutions would be preferable.
- Exposure to API monitoring, logging, observability tools, and proactive performance tuning.
- Formal educational qualifications and experience may be relaxed for exceptional candidates.

Note: Candidates selected in this interview could be considered for other vacant positions at DIBD-DIC requiring similar skill sets and at appropriate level.

General Conditions applicable to all applicants covered under this advertisement:

1. Those candidates, who are already in regular or contractual employment under Central / State Government, Public Sector Undertakings or Autonomous Bodies, are expected to apply through proper channel or attach a 'No Objection Certificate' from the employer concerned with the application OR produce No Objection Certificate at the time of interview.
2. DIBD-Digital India Corporation reserves the right to fill all or some or none of the positions advertised without assigning any reason as it deems fit.
